

24-7 EMS offers a dynamic, visual learning experience for first responders, EMTs, and paramedics. Streaming video brings the reality of the street to online CE training. With 24-7 EMS, delivered in the CentreLearn Learning Content Management System, you have total control over your training. The lessons are easy to use, implement, and track. Facilitator led classroom or self-paced online options mean training when you want it, where you want it. The scenario-based videos, medical expert interviews, and skill demonstrations used throughout these programs will have your team ready for any challenge. Use 24-7 EMS titles alone, paired with other CentreLearn lessons or classroom materials, hands-on exercises, or in combination with your own uploaded content – the choice is yours.

- 1.04.3 Spinal Injuries
- 1.05.1 Musculoskeletal Emergencies
- 1.05.3 Emergency Driving
- 1.06.2 Burns: Thermal
